Figure 1 ROC

Footnote:
Respondents were dichotomized in 3 different ways: i) ‘Much better’ - headache was ‘much better’ versus headache was better, about the same or worse; ii) ‘Much better, better’ - headache was ‘much better’ or ‘better’ (that is, the improved group) versus headache was the same or worsened (the not improved group); and iii) ‘Much better, better, same’ - headache had improved or remained about the same versus headaches had deteriorated.
